

The economical „big ones“.

MGB 1,1

The MGB 1,1 for tenancy buildings, offices, trade and industry.

The plastic KLIKO MGB 1,1 is in use wherever household waste of any kind cannot be collected economically in MGB 120/240s. It is extremely easy to handle, of great advantage to the user and improves job conditions for employees.

Quality and economy/efficiency.

The KLIKO MGB 1,1 has been constructed from highly molecularized high density polyethylene by the compact injection moulding method and conforms to the DIN EN 840 regulations.

loading for „comb“ discharge

It is in serial production for DIN as well for „comb“ discharge and available with a capacity of 0.66/0.77 cbm and with hinged lid.

Special features:

- UV resistant
- sturdy, long-life expectancy
- not noisy
- low net weight
- resistant to chemical and biological effects
- cadmium-free.

Easy to handle.

A satisfactory number of well-placed hollowed grips guarantee easy handling. The sliding lid is stoppable in 3 positions and equipped with child proof. The container rolls on four castors with full rubber tyres and suited to heavy weights (200 mm) with

loading for DIN discharge

forward stoppers on the front. This means the MGB 1,1 stands quite firm and safe.

child proof

The lockable central brake on both wheels on the broad side is also available.

swing-lid/self-closing lid with spring support

Ecofriendly.

The KLIKO MGB 1,1 containers are not only cadmium free, they can also be easily recycled by a process of regranulation, whereby the recovered material can be used to create a number of different products, thus forming a complete circle.

Technical features:

- Available in all necessary colours
- special models also available as paper/glass containers
- Certification for GS/TUV marking
- personalised lid- and/or body marking possible
