

Declaration of conformity

COMMISSION REGULATION (EC) No. 2023/2006

This is to claim under our sole responsibility that the following product is in conformity with the regulation (EC) No. 2023/2006: **Pallet Euro H1**.

Quality assurance system

Products which are placed into circulation by Craemer company, especially those for use to produce foods, pertain to regulation (EC) No. 2023/2006.

Article 5 declares that the business operator shall establish, implement and ensure adherence to an effective and documented quality assurance system. That system shall

- take account of the adequacy of personnel, their knowledge and skills, and the organization of the premises and equipment such as is necessary to ensure that finished materials and articles comply with the rules applicable to them;
- be applied taking into account the size of the business run by the operator, so as not to be an excessive burden on the business.

Starting materials shall be selected and comply with preestablished specifications that shall ensure compliance of the material or article with the rules applicable to it. The different operations shall be carried out in accordance with preestablished instructions and procedures.

Quality control system

Article 6 declares that the business operator shall establish and maintain an effective quality control system. The quality control system shall include monitoring of the implementation and achievement of GMP and identify measures to correct any failure to achieve GMP. Such corrective measures shall be implemented without delay and made available to the competent authorities for inspections.

Documentation

Article 7 declares that the business operator shall establish and maintain appropriate documentation in paper or electronic format with respect to specifications, manufacturing formulae and processing which are relevant to compliance and safety of the finished material or article.

A certification according to ISO 9001:2000 guarantees the effective operation of a quality assurance system and a quality control system, combined with the necessary documentation.
